

Environmental Sustainability Policy Statement **(Incorporating Energy and Carbon Management)** **2025/26**

Alpha Construction Ltd recognises we have a responsibility to future generations and the planet. We have responsibility to minimise our impact on society and the environment when we undertake our business.

Our Vision

We strive to conduct our business activities according to rigorous ethical, professional and legal standards.

Our Principles

a) We will improve our resource efficiency

We will reduce the supply of natural resources used in our products. We will work with our clients and suppliers to use alternative materials and methods to minimise the use of raw materials. We also promote measures to recycle and minimise waste.

b) We will limit our environmental impact

We will take all reasonable measures to ensure our activities are conducted in a way that minimises our impact on the local environment and on the planet in general.

c) We will improve our energy efficiency

We will minimise energy usage by considering energy performance improvements for our head office premises and our construction operations.

d) We will reduce our CO₂ emissions (Greenhouse Gases)

We will work with our clients to provide low carbon solutions. The selection of company vehicles will take into consideration CO₂ emissions

An Environmental Sustainability Protocol (Incorporating Energy and Carbon Management) is in place to enact this policy.

This policy statement, the associated Protocol and the operation of the **IMS** will be formally reviewed by the Managing Director on an annual basis but may be updated at other times, as required.

This statement will be made available to all interested parties, including the public.
